The Standard Group, was founded in 1986 by Jabir Rasheed, a Mechanical engineer and Entrepreneur, who started Standard Ship Spares LLC (SSS). The Focus of SSS was to procure and supply Emergency marine equipment and spares to the shipping industry in the UAE and Middle East which was a rarity in this region at that time. This was made possible by a good network of worldwide suppliers with whom Mr. Rasheed had formed strong business relations and tie-ups. In 2003, Standard Technical Supply LLC (STS) was formed to venture further into Industrial and Petrochemical sectors. In 2006, Standard Pumps Trading (SPT) was started in Abu Dhabi to cater and service our clients in Abu Dhabi's Oil & Gas and government sectors. Managed by qualified Engineers, the company has witnessed accelerated growth in the Marine, Industrial and Oilfield sectors over the past two and half decades. Known in this region as Specialists in Pumps and systems, Marine and Oilfield equipment, Ventilation and extraction equipment, the Standard Group is dedicated to providing timely and well-engineered solutions to its clients.. Our customer base is spread throughout the GCC and Middle East

Contact Person: Mr. Hussein Rasheed
