Established in 1993 to supply and service aircondition units in the local market in UAE, Airtron has gradually progressed into a major player in the Gulf countries to supply complete airconditioning outlets from five to six story buildings to high rise apartments. We cater to our customers requirements from the smallest duct to full central airconditioning equipment like Grilles, Diffusers, Volume control Dampers & all other central aircondition openings that keeps the interiors of your home cool in the scorching heat of the arabian summer. Our spacious factory and offices of over 20000 square feet are located in the industrial area 3 of Al Ghusais (Dubai). Our central location and nearness to air and sea ports makes it possible to offer our products at very competitive prices and meet our delivery schedules on time. Our well stocked factory and warehouse, state of art machinery and committed staff makes it possible for us to keep our customers loyal and happy who have made it possible for Airtron to grow from strength to strength.
