We supply all types of high quality air conditioning equipment for heating and cooling, ranging in capacity from 1 ton to 300 ton systems, to meet residential, commercial and industrial needs. Our product line includes decorative fan coil units, window air conditioners, ducted split air conditioners, various condensing units of up to 100 ton capacity, decorative and concealed type fan coil air conditioning units, air handling units, heat pumps, air cooled water chiller units of up to 300 ton capacity, and roof top package units of up to 50 ton capacity.

We have our own team of engineers, who work closely with a network of manufacturers, to provide detailed proposals and presentations showing you how we can best meet your exact air conditioning needs. We take into account your geographical location and how our air conditioning products provide heating and cooling to suit your climate. Our engineers design functions that are energy efficient and improve indoor air quality. Recently American Breeze became a member of the US Green Building Council.

We deliver internationally, without exception.
