ELECTRO COOLING CENTRE LLC (ECC) was founded in Abu Dhabi in the year 1981 for specialized Air Conditioning, Ventilation and Refrigeration services for industrial projects, residential complexes, all types of automobiles, computer rooms and special application. ECC had first started its services in the field of domestic and automobile air conditioning and thereafter expanded to all other services as per the need of particular air conditioning and refrigeration field in Abu Dhabi. Now ECC has expanded in the emirate of Abu Dhabi including "AL Ain" and is providing its prestigious and quality service in various mechanical and electrical fields. At present ECC has its head office situated at Hazzaa Street in Abu Dhabi and regional office at Sanaiya in Al Ain. Electro Cooling Centre LLC is fully geared to undertake all types of designing, installation, servicing, and maintenance of every type of MEP, air conditioning, refrigeration, ventilation and heating plant buildings for hospitals, power stations and industries. Its experience of over 28 years coupled with quality of its workmanship and the commitment of its employees, gives it the requisite competence and the confidence to play a vital role in the engineering services industry. Our experience includes HVAC installations for over 100 buildings, several MEP and only electrical installations in high-rise buildings.
