Established in 1986 Arab & India Spices Ltd was one of the first millers of various kinds of pulses and ground spices in the whole of Middle East Region. Though starting modestly with per day production of 4 Mt, we have today surpassed production capacities of more than 12000 M Tons per month and our annual turnover exceeds US\$.125 million. From milling and grinding we have now diversified our areas to even processing of whole spices and consumer packing. We already have state of art machineries including eight 'Z' category Sortex machines of UK origin, which help us to maintain the high standards of quality which we have set for our products. Currently we are importing raw pulses from most of the major pulses producing countries like Myanmar, Australia, Canada, USA, China & India and we specialize in Masoor Dal (Red Split Lentils), Chana Dal, Moong Dal and Urid Dal (Washed Split). Spices are mainly procured from India, China, Sri Lanka, Vietnam to name a few. Apart from catering the needs of U.A.E our supply also covers all the GCC countries, most of Middle East. We also cater to needs of selected customers in UK, USA, Canada, Australia and Far East. Apart from our offices in Dubai , Sharjah & Ajman which are situated in UAE we also have offices in Doha , Oman & India.
