Established in 1994, Asqalan began as Asqalan Construction and Development, a grade III construction company based in the capital of United Arab Emirates; Abu Dhabi, under the management of the present chairman Dr. Eng. Hassan Oudah. Along with the development of the construction sector, the company experienced a steady growth and gradually built itself a portfolio filled with multidiscipline projects, keeping the pace with continuously evolving construction of multi-stoned buildings, marriage centers, fire stations as well as luxurious villas. Asqalan successfully expanded since the beginning of its journey, developing "Asqalan Electro-mechanical Est." and "Asqalan Trading Est." in 1995, and "Arabian Stone" and "Al-Majdal Carpentry" in 2002. The development of Asqalan sister companies helped build onto the strong foundations of Asqalan Construction and Development into a well-reputed Asqalan Establishments, with offices held in Abu Dhabi and Al Ain employing over 750 employees.
