Trans Mediterranean Airways (TMA), is the only Lebanese specialized all-cargo airline. Throughout a long-standing history, stretching over more than 50 years of professional achievements in the air transport business, TMA played an active role in servicing and developing the international trade.

TMA was established in 1953 by Mr Mounir Abu Haidar, as an all-cargo operator then grew rapidly to become one of the world's major cargo airlines with one of the largest international all cargo networks linking major cities in the five continents. A major advantage for our airline is its important surface of 31,000 square meters built at R.H.I.A. including two main buildings dedicated to head office Management. A Hangar for Maintenance with facilities. Its well equipped Warehouses for Handling & Storage services. More details are found under Ground Handling section. New Cold Storage Center, 320 sqm for export and import, one at -2°C and second at 8-24°C. (More details are found under Ground Handling section)
