Established in Sydney in 1955, the Bisley group is a multinational marketer and distributor of quality industrial raw materials focussed on Australia, New Zealand, Asia and the Middle East. Our products range from Fine Chemicals for highly specialised applications, to bulk Metals and Alloys delivered in shiploads to major steel mills and smelters. Bisley's business traverses a broad range of industries including steel, aluminium, foundry, welding, construction, building materials, water treatment, plastics, agrichemicals, refractories and ceramics. Our goal is to provide a complete package of technically outstanding products, supported by proficient, responsive staff and first class logistics. After more than 55 years in business, we are proud to remain a privately owned Company, with sufficient resources to undertake complex, large scale transactions, and the flexibility afforded by a lean and responsive management structure.
