Based in Berlin - Germany, ESC 700 established is principle Branch for the Middle East in Dubai, United Arab of Emirates since 2005. To answer all aluminum system needs, ESC 700, through engineers and consultant's team (Eng. Wolfgang Frei , Dipl -Eng. Torsten Junje, Dipl - Eng. Karsten Grabenhorst), accomplished full studies and analysis about systems existing in both local and international markets. This step was necessary to provide system offering total solutions for different market requirements. In a second stage, ESC 700 considered all out-coming results to design, thought its creative and experts engineers, Four-way and Two-way Curtain wall (Stick and Unitized System), Sliding, and Hinged, all in both Normal and Thermal Break systems. Before offering ESC Modem system to the different markets, tests have been done by IFT-Rosenheim Germany. All DIN standards confirmed all Aluminum structures, water, air and wind load specifications among others. ESC 700 is developed and tested to suit high rise and small buildings in most environments. Aiming to offer high performance system to satisfy our dealers, ESC 700 technology ensures best quality in providing accessories intern/extern EPDM vulcanized mold rubbers and AA6063/AA6061 aluminum alloys.
