The John Aluminium & Glass Factory was founded on a dream. The company wanted to provide the building fraternity in the United Arab Emirates with the answer to their dream: A highly dependable, high-quality source and installer of aluminium, glass, aluminium composite cladding and all other related building metal works. The dreamers at John Aluminium had already a collective expertise of over 15 years in the region. And over the last fifteen years, have been responsible for developing that organization into a respected, preferred and profitable enterprise.
