ALFAJER Advocate & Legal Consultants was established in 2000 and has offices in Dubai and Sharjah. We are one of the few law firms in the region, which are licensed to offer legal consultancy as per international standards and litigation under one roof across all courts in the UAE. Our team consists of national qualified lawyers and internationally experienced legal consultants from different jurisdictions and cultures. We have the knowledge and resources to deliver a broad scope of quality legal services required to both international and local clients. We understand and value the importance of cultural and social differences which play important roles in dealing with our client's legal needs in this part of the world. We provide legal services to a broad spectrum of regional and local organizations and individuals as well as global and multinational corporations. We also, through our membership of Geneva Group International, have a network of associate offices in the world, to assist our clients for their cross border issues.
