Global Agencies & Marketing is a 100% locally owned trading commercial agency and technical services establishment, specialized in supplying and installing various construction related products, and representation for oilfield services. Throughout 20 years of experience, excellent relationships have been developed with Government Departments, Consultants and Contractors. This led our products and designs to be used in many prestigious government and private projects. By capturing such a niche in the market, we became the leader for all the products we officially represent.
