Islamic Architects Consulting Engineers is a company which gives a unique identity for each architectural design we create. Traditions have a special effect in our designs, Our services starts from Design, Supervision, Project Management, full landscape solutions, Interior Design, from furniture and art works to building material selection. We work closely with the clients, to provide complete solutions on each stages of the project. Our experience in developing private villas, residences, hi-tech commercial towers, elegant showrooms, mosques, and other architectural structures are enormous. With highly skilled and experienced staffs we always provide innovative ideas Understanding the cultural traditions, combining technology with functional requirements, and our passion to create a world of luxury, comfort and convenience makes our design a clear spatial configuration with a visual impact. View our projects section to have clear idea, on what we offer.
