In the last decade, model making has improved from time-consuming fabrication to quality high-speed production, thanks to the emergence of computers. And we have been consistent in exercising our expertise together with the use of intricate engraving and cutting machines to three dimensional and laser technology to serve the quest towards perfection. Welcome to our model making world of miniature. Proficiency is a direct result of our competent staff, a team of qualified model makers, to whom the degree of competence is of paramount importance. Following the unique style of its founder chairman, a role a model to the current generation of Model Makers, AHMM is always ahead of its competitors.
