Fax: 971 4 8830392

Power and Control Fzco success story began back in 1994, with an idea to design and assemble Full Type Tested low voltage electrical panel boards up-to 7000A in compliance with IEC standards and certified from reputable institutes like ASTA and KEMA. Power and Control Fzco products cover the full range of low voltage switch

gear manufacturing: Distribution Panels.

MCC Panels.

Capacitor Banks.

Generator Control Panels.

Intelligent system integration. As one of the UAE's leading Panel builders, we at PNC are passionate about quality in every aspect of our product. It's a philosophy that underlies our vision, to ensure maximum customer value, for both contractor and end user.

With multiple projects in throughout the UAE, QUATAR, NIGERAI and LEBANON, we are pledged to lead by innovation, LV panels that offer a unique combination of engineering, workmanship, and technologies. Our company was capable of imposing its good reputation through the projects which were executed under the supervision of major consulting firms (e.g. Khateeb & Alami , Dar Al-Handasah , Laceco , Ace , Spectrum, Pierre Dammous, and others).
