In 1985, Mr Neetish Ramniklal Doshi founded N R Doshi & Partners in Dubai. Mr Doshi had been a senior accountant with a highly recognized local company. He chose to leave the comfort of an established company to pursue his plan for public accounting. Mr. Doshi was committed to providing services to mid-sized companies, a commitment the firm still holds today. Since 1995 we have experienced rapid growth. The key to providing the best accounting and consulting services is to match our services with your specific needs. We take the time to learn your goals and objectives, and apply our specialized industry knowledge to help you achieve success. This level of service is available through our unique structure and size – The individual local office structure of the firm allows partners and staff to work closely with you, in order to develop an awareness of your specific business needs. Our overall size allows us to offer unlimited service opportunities backed by the expertise of our nationwide network. Our low staff-to-partner ratio assures our clients significant partner attention and continuity of personnel. In order to assure that we meet our commitment to quality and service, N. R. Doshi & Partners has proprietary procedures with respect to the quality of our work. These procedures are designed to provide reasonable assurance that, in performing services, our personnel will be competent, objective, and will exercise due professional care.
