25 years of success passed since we started in 1988. Based in Dubai, we got the chance to follow the development of the UAE & the neighboring Gulf countries, allowing us to know very well the needs of the construction sector in the Gulf. We are a professional trading company, grouping under one roof, a wide range of construction materials, we represent worldwide known manufacturers and cover the Middle-East region. We believe in Quality, and we decided from day one, to distinguish ourselves, by offering only high quality products to the market, knowing that this decision will make it difficult for us to be competitive, but we managed with our selected partners, to provide the market with the best products, and at competitive prices. Our philosophy of quality was the main reason behind the excellent reputation we enjoy today in the market, we are proud of our clean history, with no failures & no complaints, with loyal clients with whom we grew up.
