Fax: +971 4 3964422

Wisdom Educational Institute, Abu Dhabi, was established in the year 1989 and Wisdom Educational Institute, Dubai was established in the year 1991. The two Institutes are approved by the Ministry of Education, UAE. Wisdom Institute hosts a multidisciplinary, integrated, UAE market requisite education and training courses under a common banner with a unified purpose to provide clients with real, practical, knowledge based solutions to current and future needs in the education sector.

Wisdom Institute brings a vast collection of international knowledge and local know-how operations across the business spectrum and a “peoplefirst” philosophy. A process of creating a unified personal service that not only straddles international frontiers but also fully understands and incorporates specific political, legal and regulatory differences relevant in the UAE in the arena of knowledge based sectors. Wisdom Institute believes in moving beyond formal/conventional coaching/ training programs to provide a comprehensive service for the clients.

The success of Wisdom Group is dependent not only on how well the education sector performs, but also on how well it is connected to the private sector. Linkage with the corporate world maximises knowledge production of a society, and Wisdom Institute produces skills relevant to the surrounding economy and the private sector is given an incentive to invest in education.

A major criterion for short term/professional/corporate training is that it must be

from a reputed and highly ranked institution in its country of origin. The short term programs are run with the syllabus, teaching methods, certificates and accreditation identical to those of the parent bodies. Furthermore, beyond the above criteria, the Wisdom Strategy rests upon the diversification of programs of study and levels of qualifications offered.

Most of the training programs at Wisdom Institute provide a valuable learning resource for professionals looking for developing their skills through flexible, parttime education as well. Wisdom Institute is deeply committed to providing practical programs to complement the knowledge economy.
