“Ni Si Fruits Savdo” LLC offers you only high quality walnut kernels. Kernels of walnuts differ from each other color, in the size, and also flavouring qualities. Color of kernels varies from light, amber up to dark brown. It depends on what party - solar or shadow the nut grows. On flavouring qualities of a kernel of dark yellow color it is better, than more dark or more light. The average calibre of walnut kernels are 2.7X2.7. The taste is completely delicious. This dimensions are smaller than the ones of ChinaUS. The taste could easily compete with South American, Chinese and American walnuts. 2010/08/18 Raisin Uzbekistan is among the oldest grape-growing regions in the world. The best known grapes of Uzbekistan are cultivars used both as fresh table grapes and for dried raisins. Uzbekistan produces sultana, red, yellow, black raisin to satisfy local and world demand.
