International Air Charter has been in the aviation business for almost 25 years and are recognised as being one of the world's largest independent private jet charter brokers. We have a global network of offices European locations, London, Nice, Moscow, and internationally in New York and the Middle East. We have ISO 9002 accreditation and we are specialists in the provision of VIP aircraft, executive jets, helicopter charter, corporate airliners and dedicated medical evacuation aircraft. Once considered a luxury, there is now an awareness of the value that private aircraft charter offers, being both cost effective and time saving. When using a private aircraft you are able to arrive just 20 minutes prior to departure, you will enjoy minimal check-in procedures, no queues, swift and secure immigration clearance, no restrictions on hand luggage and the peace of mind of additional safety and security. Our unique Computerised Aircraft Tracking System 'CATS' means that we can contact hundreds of aircraft operators in a matter of minutes and locate the most suitable aircraft for your itinerary by size, type or location. View the aircraft we offer on our website [www.privatejetcharter.ae](http://www.privatejetcharter.ae)
