Manpower supply and recruitment is our only business. We have an affiliation with agents in different countries partnering with us to provide the most suitable staff for our valued clients. Our website and online job postings receive thousands of visits every day from the UAE, the GCC and around the world. Our database is refreshed and updated every 3 months where you will find only serious job seekers. We have in our strong team qualified HR Consultants who would work alongside the management and employees of your company to provide guidance, direction and advice about the application or interpretation of human resources and labor policies, practices and procedures. The HR Consultant also work closely with Legal (Compliance), Equal Employment Opportunity, Security, Safety and Health (Occupational Injury) and other departments or offices to ensure that managers and employees comply with federal, state and local employment laws and regulations, and that management responds to correct and address violations in order to promote and foster a safe and hostile free work environment. Being privately owned, we are able to provide a level of personalised service which is unrivalled by many of our competitors - and that means you're more likely to find

us efficient, friendly, honest and, above all, able to provide you with exactly what you need.
