Burst test and Proof Pressure test on various of Hose, Tubing, Pipe and Coupling. Technical Maximum test pressure: 400Mpa Test medium: Water Generation of pressure: SC pump Number of the test pieces: 1 pressure port Energy demand: compressed air min 0.7bar Timing range: 0--999 h Power: 220V AC Features: Fully automatic operation controlled by PLC, supports real time display of pressure values and time, etc. Test time can be set freely, and automatically stops after finishing the test. Unmanned testing site monitored by camera at real time All high pressure valves, pump, tubing and fittings made in USA with 316SS to guarantee the high testing precision and stability, and suitable for most of the liquid test medium. Automatically alarms and terminates the test against over-load, overtime and leakage
