

# high pressure injection pump / packer

---

510500  
China

Injection pump Usage: EPOXY, polyurethane injection for structure strengthening/concrete repairing  
The following are the best sellers:  
SL-605: max output pressure can reach 10000PSI  
SL-808: max output pressure can reach 13500PSI  
SL-999: max output pressure can reach 15000PSI  
Similar look, most sparts are exchangeable. Seal kits and pump sets are designed specially for different model and both are considered as easy-wearing parts. Need to replace regularly.  
Injection packer Usage: EPOXY, Polyurethane injection for structure strengthening/ concrete repairing
