Glass Rooms is a UK company using uk qualified workmanship. Established with a background of over 30 years experience in glass. Be impressed by the quality of the design and build. Be more impressed with the efficiency, effectiveness, and performance from our highly-intelligent, solar controlled glass. We guarantee to provide you with a plethora of natural light without the heat. Unlike traditional extensions and conservatories, our Glassrooms cater for all seasons at a comfortable room temperature you can enjoy year-round. We tailor make our glass products to suit our clients needs but our range includes;

- Independent glass rooms for entertaining / majalis
- Glass Rooms extension / Garden room
- Bi-folding doors
- Skylights
- Glass floating stairs
- Glass Pergolas
- Glass Bars/Majalis
- Glass Cladding in a range of colours

How is it solar controlled? Firstly the glass is 35mm thick, which means it is strong enough to walk all over. Secondly, it is triple layer with silver a reflective material. Our level of UV protection is 90% of UV light, which means that less than 10% of heat radiation, is allowed in reducing A/C bills. Far less than the standard glass used for windows that allows over 60% of heat radiation through. Safe Glass and Durable The glass is structural, durable and safe. It is toughened and laminated. It is the way it is bonded it does not allow the glass to evacuate but keeps it internally within the glass form and structure and does not allow it to separate. It is structural glass will stand as long as the building. Low Maintenance Our self-cleaning chemical application will make it easy for you to clean and maintain. Simply hose the glass with water and leave, no polishing required.
