AL NIMR CIVIL ENGINEERING LLC

Al Nimr Civil Engineering is a leading turnkey contracting company, which has recorded two decades of impressive excellence. The company has an advantage of belonging to a well-focused and diversified group; the Tiger group of Companies.

Al Nimr Civil Engineering focuses on:

- the construction of Residential and Industrial Buildings, Warehouses in preengineered & hot rolled steel and buildings in R.C.C. & steel.
- civil construction works right from earthworks, foundations and substructure to underground services and ancillary works.
- structural steel work which includes fabrication and erection of steelwork for industrial complexes, specialized structural components, storage tanks, factories and warehouse buildings
- MEP works such as supply and installation of electrical, air-conditioning, fire fighting, fire alarm and plumbing and drainage works. The company has many successful projects to its credit all over the Emirates, notably the industrial and warehousing facilities in the industrial areas of Dubai, Jebel Ali Freezone, Dubai (DIP), Sharjah, Saif Zone, Hamriyah Freezone, Ajman and Ajman Free Zone.

Al Nimr has gained an in-depth understanding of client requirements in this region and has adopted flexible project management policies to meet critical quality and time considerations. The company has acquired expertise and material resources

for better adaptability to specific project requirements.

Al Nimr offers a wide range of commercial contracting options varying from the traditional lump sum method to unit rates for manpower, materials and equipment with performance guarantees and liquidated damage risks.
