AWAZEL Company was established in 1981 with the opening of an oxidation plant & membrane production lines in Jeddah & Riyadh to become the largest and most comprehensive manufacturer of bitumen (Asphalt) based waterproofing material in the Middle East. We export our products to GCC, Middle East, Southern East Asia, Africa and Eastern Europe."Straight Run" bitumen is taken from the refinery and upgraded by an oxidation process into grades defined by melting temperatures and resistance to penetration. This bitumen is used to manufacture roofing felts & membranes in rolls having a variety of inner bases, i.e., paper, jute, Woven glass, polyester fabrics. Bitumen is also modified with APP (Atactic Polypropylene). SBS (Styrene Butadiene Styrene) etc.. to improve its performance as roofing / tanking membrane.We use a high end advanced technology of production, manufacturing that confirms to ASTM, BS, DIN & European & Canadian Standards. We have been certified by AOQC-MOODY INTERNATIONAL to ISO 9000 standards.The use of our products includes :- Roofing & Tanking waterproofing Protection of Concrete against aggressive salts & acids Anti-Corrosion Joint Sealing Road Construction
