Fax: +971 4 3947883

Drs. Nicolas & Asp was established by Dr. Nicolas who first established his small private practice in 1991 at the now famous DNATA building in Deira, Dubai. It was at this location that the practice quickly established itself as a leading Dental Practice, with an enviable client list including many senior airline personnel and prominent local families in the Emirates. The practice's reputation for providing the very best treatments in a safe and sterile environment where patients could feel comfortable and relaxed, were unrivaled at the time.

In 1994 Dr. Nicolas found himself unable to keep up with the demand for his services and was encouraged by patients and friends to look for larger premises. Somewhere that could take him nearer to realizing his goal of, eventually becoming the Largest Private Dental Health Care Provider in the U.A.E.

At this time two other prominent Swedish Dentists were looking to return to the Middle East having practiced General Dentistry previously for three years in Dubai. Husband and wife team Dr. Sven & Joan Asp, who were already highly regarded by their professional colleagues and members of their own community and shared the same standards and visions, returned to join Dr. Nicolas at his new premises back then, a small but ideally situated villa at the heart of Jumeirah.
