Chabros Timber Trading During the late sixties and due to the rising of the forestry protective act that restricted the felling of wood, the world of wood resorted to veneer instead of solid wood for all wood productions because of its ecological and economical benefit; and through Chabros, the Lebanon and later on the region, was introduced to this alternative. Our vision, since the beginning, was to expand our business further in order meet with the industry's demands and replenish the shortages that existed; however, and due to the wars and political unrest in Lebanon, we could not pursue that vision until 1998 when we ventured into the G.C.C. with the establishment of our Dubai branch. Over the last eight years, Chabros has grown from a single company based in Beirut into a group of companies distributed through the G.C.C., Levant, North Africa, and East Europe with over 600 employees in its current branches: Beirut, Dubai, Abu Dhabi, Riyadh, Jeddah, Doha, Muscat, Cairo, as well as its mills: in Ukraine and Serbia. A plan to extend further into the region is already in progress.
