MHE TRADING CO LLC was established in early June 1995.

Our company's growth and experience has evolved since then to reflect our current status within the commercial and private sectors of business.

Our specialised concrete sawing and drilling inventory enables us to complete complex and difficult job tasks at short notice. In support of this equipment our fully trained operators will complete any job task requested, safely and efficiently to the customers satisfaction.

Our companies scope of work is determined by our customer needs. We have a unique ability in diversifying and adapting to all requests for difficult and out of the ordinary work sites.

Our current work commitments are spread throughout most of UAE. We have the resources to mobilise any work request within 24 hours subject to stock requirements. Part of this service often requires prior inspection, which is supplied free of charge as required to the customer.

Contact Person: Mr. Nelson John
