GALF's RFID business unit has been created to supplement our present offerings of Bar Coding, Warehouse Management and Label Printing businesses. GALF was established in 1989, the company's main business is label printing. Label printing still remains our main product, however over the years we have added components to our business to provide our customers more of the products and services they require. Focusing on our strengths and expertise, we decided to launch an RFID unit. This new launch has taken many months of planning, advice from expert consultation and forming strategic alliances. We are not venturing into the RFID business without the proper knowledge and training. We have spent a great deal of time and investment making sure that GALF is a certified RFID vendor for the products and services we represent. Furthermore, we have partnered with other companies to ensure we are able to provide a turnkey solution for all the RFID systems we sell and install. One example of our commitment to the RFID market is the ability to maintain and repair RFID printers on-site and in-house. This means that our customer's equipment will be maintained with minimal downtime. Whether you have known us for years or just found us, we look forward to impressing you with our uncompromising professionalism, support and after-sale services. On behalf of the management team at GALF, we want to thank you for visiting our site. If you have any questions, please do not hesitate to pick up the phone and let one of our knowledgeable staff members assist you.
