Founded in 2001, Coldair International LLC is recognized as one of the leading companies in the refrigeration and air conditioning products and accessories supply market. Coldair with its international partners has successfully positioned its products and services to meet the needs of its customers in the ever-changing refrigeration and air-cooling industry. The strength of Coldair is its progressive and innovative business attitude as a services provider, marketer and distributor in this growing construction and services sector of the Middle East North Africa marketplace. Always innovative, Coldair has supplied to several leading projects with air-conditioning and refrigeration products and accessories. We take lots of pride in ensuring the supplies are well structured and on time with the project needs and designed according to given specification to meet wide range of applications from small appliances and residential air conditioning to large commercial facilities and chillers. We have a wide range of Products like all kinds of Copper Tubes and Pipes in Coils and Straight Length, Capillary Tubes and Copper Fittings. We are also a leading supplier of HVAC and ACR products meeting International Specifications and Standards.
