Al Shirawi Electrical & Mechanical Engineering is specialized in providing complete mechanical and electrical services for the building industry. It is regarded as one of the most dependable contractors for electromechanical services. The company specializes in turnkey contracts, handling everything from systems concept to installation, testing and commissioning. Al Shirawi's Mechanical & Electrical contracting services are supported by one of the most modern sheet metal shops in the UAE with the capability of producing GI, preinsulated aluminium, square, round and fire rated ductwork. With a 2000 people workforce, Al Shirawi is geared up to meet the most demanding schedules in quick time. Working out of a purpose built 160,000 square feet facility with a modern logistics infrastructure, Al Shirawi has the capability to undertake mechanical and electrical projects across the globe.
