Aluminium fabrication is the heart of our business. Since the discovery of aluminium in 1827 the world has accepted this metal which allows high strength-to-weight ratios. Each year more and more uses are found for Aluminium fabrication needs. I-met stands for fabrication needs in the 21st century. We specialize in high aesthetics and technology for all standard architectural applications like doors and windows, cladding, curtain walling and structure glazing in which sound proof and shatter-proof glasses are fixed. I-met is guided by the philosophy of offering quality, technology, customer satisfaction and dynamism at the most competitive prices. The ZIYAD ALUMINIUM AND GLASS L.L.C was founded in 1975 by Mr. Bahadur Singh on the basis of providing the highest quality product available while offering the best possible service. Still owned after more than 30 years, ZIYAD continues to maintain those same standards of excellence. From the modest beginning, it has grown into a full fledged aluminum & glass works service provider in the local region. Our pride lies in the competence and skill of our workforce. ZIYAD considers employees as most valuable resource. We always attract and retain professional and motivated workforce. Ziyad Aluminum & Glass LLC proudly

presents its substantial contribution as a market leader in aluminum & glass fabrication and installation in UAE markets; since 1981.
