Spectrum was founded in 1974 to deliver the best engineering services to international clients. Our main focus is to improve the quality of life and the environment through the provision of sound engineering and architectural services. We provide specialist consultancy services to the manufacturing Industry. Our proven experience allows us to serve a diverse range of industry clients. We acknowledge the escalating needs of the education sector and have developed custom services in response and ended up in providing a full range of professional services to local education authorities, schools, higher education, and other educational bodies. Likewise in the Tourist Industry with up-to-date state of the art Green building designs that has proven to benefit both the Clients and end users; such buildings include 5 stars hotels, recreational facilities and Marinas. As the leading consultancy firm in the transportation sector, Spectrum provides sustainable and innovative transportation solutions. We support highways authorities through advanced planning, innovative design and intelligence maintenance. Besides, we have been delivering state of the art consultancy services in Urban Planning . Our success lies not only with our exceptional pool of talented architects who draw on global influences and traditions, but also with our extensive teams of structural and building services engineers and sustainability consultants. Thus ensuring that our multidisciplinary team who combine traditional methods with modern technology.
