AEC is a national UAE firm founded in 1987. With over 20 years of design experience and over 25 Million sq.f of construction projects, the firm has served a broad range of clients and established a solid reputation with its dedicated principals, creative designers, skilled engineers, effective project management and accurate contract documents. As a team we believe that the key ingredient to our successful business practice is rooted in our client services and meeting their milestones. It takes skilled Engineers working together to make great architectural projects. AEC provides the highest quality of professional Architectural and Engineering services for clients and projects throughout U.A.E. and abroad. Without compromise this approach has generated exceptional mutual loyalty between us and our clients for their architectural design needs or project's management.
