What is remarkable about our transformation from small beginnings, into today's company covering 70,000sqm, employing over 350 staff, and with an international client base, is how we remain firmly bound by the tradition of service, which has been at the core of our operations in nearly 40 years. The three divisions of ADOS and its wholly owned Dubai subsidiary, MEOS, provide between them the capability for which ADOS is renowned and have allowed us to handle a wide array of assignments for both local and overseas customers. The ADOS Engineering Industries Division has a modern Machining and Fabrication facility in Mussafah and Jebel Ali, serving the Gulf and beyond, enabling us to offer machining, fabrication and repair services. Our ADOS-Klinger Gasket Factory located in Abu Dhabi's industrial area, is technically associated with Klinger UK, a world-wide name in Gasket material and manufacturing. Our Abu Dhabi facility produces both standard and bespoke sealing solutions. The Agency Division, based at our Abu Dhabi head office and also in the heart of Dubai's business district, represents in the UAE more than 40 major international companies, providing Drilling Equipment & Services, Instrumentation, Rotating Equipment, Marine and Forecourt related products and services. A highly skilled team of qualified sales engineers, supported by purchase and supply personnel, ensure that our customers benefit from the optimum sales

page 1 / 2

and after-sales service.No text can ever be an effective substitute for direct personal experience or adequately demonstrate the scope of our facilities and commitment to quality and service. We welcome the opportunity to show you our facilities first hand and to demonstrate why ADOS is the company it is today.
