At First Step Nursery in Abu Dhabi, we go beyond the syllabus to nurture laughter and creativity, helping children be the best they can be. We give them the finest facilities to encourage talent. We take them outdoors so they can learn to appreciate the land they live in. We ensure they get a balanced education, alongside students of other nationalities, fostering mutual respect. We work to make certain that each student leaves with a confident approach to life, an enquiring mind And a generous heart? We aim to: Sustain a friendly, safe and interesting environment that stimulates and encourages the fascination of learning. Treat every one in our Nursery Community as an individual, valuing their contributions and accomplishments. Develop good Home-Nursery interaction and together improve the quality of learning. Ensure that our children follow a well planned and stimulating programme of study, with a wide variety of learning opportunities that increases knowledge and promotes understanding. Determine and improve the capabilities, proficiencies and talents of each child in all sections of the curriculum. Work with the children to attain the high standards that we expect from them in all aspects of life in school. Help the Children develop a sense of right and wrong as the foundation for relationships, alongside consideration of rights, feelings and well being.
