Metito, the leading provider of choice for total intelligent water management solutions in the emerging markets. Founded in 1958, Metito has acquired a wealth of experience providing customized, comprehensive and advanced solutions across the full spectrum of its industry - from clean to dirty water - for the municipal, industrial, and oil and gas sectors. The thousands of projects to Metito's credit and its proven record of reliable performance earned it the trust of market leaders, a reputation for professional excellence, and a unique portfolio of iconic projects. Metito was the first company to introduce the reverse osmosis technology outside the USA in 1972 and the first to pioneer concession contracts with private entities, under a BOOT scheme, in the GCC region. The Design and Build arm of the group specializes in custom design and manufacturing of water treatment, wastewater treatment and desalination plants/systems. Through this business unit, Metito has successfully executed over 2000 projects in worldwide locations. The Concessions and Utilities business provides full-service of water supply and wastewater treatment under build-own-operate, build-operate-transfer, build-own-operate-transfer, takeover-operate-transfer full concession business models, and O&M

contracts. The Utilities business currently manages a total installed capacity exceeding 1million m3/day at its China concessions alone. Metito doesn't compromise on world-class output and the Group is endowed with a committed and highly qualified team of professionals who possess the refined skill sets needed to; evaluate, select, develop, implement and maintain state-of-the-art water treatment technologies and solutions. We pride ourselves with our tailor-engineered systems made to industry specific requirement and in synch with the actual needs of our clients and the challenges of the markets where they operate. The Group is now at the forefront of the water and waste water industry with a current global project portfolio in excess of US\$ 1 billion and above 2500 employees across its worldwide operations. Our Global Headquarters in the UAE is supported by strategically located regional offices in Egypt, Indonesia, and China, and overlooks twelve (12) local offices in various regions. Through this intricate network the Group effectively manages thousands of projects, spanning four continents. We are committed to adding value to our clients and confident in our ability to provide them with the most effective, intelligent and sustainable water management solutions - at their best.
