

Al Jazeera Factory for Construction Materials

Abu Dhabi
Po Box : 9081
United Arab Emirates

Phone: +971 2 5822768
Fax: +971 2 5822353

The production of Autoclaved Aerated Concrete (AAC) Thermalite Blocks in UAE was pioneered by Al Jazeera Factory for Construction Materials using the German Technology under the supervision of the German Consultants. Started in 1990 with single production plant with a large capacity, AAC Thermalite Blocks from Al Jazeera successfully accepted all over UAE and across the GCC and due to this wide acceptance and popularity of the material, Al Jazeera Factory commenced a new production plant for mass production in 1999. Now, a new plant in Dubai, Delmon AAC Factory (our sister concern), is focusing on manufacturing AAC Thermalite Blocks with the latest technology and has the facility to produce "Reinforced Panels" used for walls, floor- slabs and roofs.
