Business Integrated Operating Systems Middle East or simply: BIOS was formed in 2002 in the U.A.E. With a pedigree in Networking and Unified Communications, since 2007 BIOS has become a lead player in Virtualization and is considered by many to be the first and one of only a few Cloud and System integrator Companies in the Middle East. As a Cloud and System Integrator, BIOS specializes in Unified Storage, Virtualization and Unified Communications. BIOS has comprehensive range of solutions in Desktop, Server and Storage Virtualization, backed with 24/7 Managed Services. Working closely with key partners, such as NetApp, Cisco, HP, Microsoft, VMware and Citrix, we provide our customers with only "best of breed" technology solutions that offer real business benefits. Typically our solutions are designed with ROI and Significant OPEX savings in mind. Alongside Our strong technical skill set and project management focus we have developed a range of solutions for businesses spanning disaster recovery, data-center efficiency, IT operating cost reduction, business process to IT mapping, achieving regulatory compliance and much more. This approach earned BIOS the title of 'System Integrator of the year 2011' by Network Middle East Magazine. Today BIOS has over 40 employees across the U.A.E. spanning 2 offices in Dubai and Abu Dhabi. From these offices BIOS serves the UAE market as well as the GCC and the KSA markets. As an award winning business and with Our unique ethos, high level of

accreditation, experience and portfolio Our customers have the comfort in knowing that they are working with a company that fully understands their Technology and Business requirements
