Bar Bending Machines Jaymac Bar Bending Machine is a semi automatic, durable, fast and cost effective machine, used for bending reinforcement bars and various forms of round bars. This machine effectively increases the production capacity of your steel yard, minimising the use of manual labour. The automatic angle selection permits a precise bend at a preset angle making it one step bending process for various forms of bends and stirrups. Easy to use, the machine can be operated by a layman with minimal experience. Jaymac Bar Shearing Machine, Bar Cutting Machine is robustly built to withstand the stress while shearing of rebar and various forms steel bars. Durable fast and easy to use, this machine, gives a one-shot cutting operation with perfect cutting accuracy thus minimising the use of labour and long drawn cutting process for single cuts. This workhorse knows no stop as it can be effectively put to use for a constant round-the-clock production.
