Mini Melts ice cream has been a great success in The United Arab Emirates since we opened our state-of-the-art factory, in Sharjah, last year. We now have a number of locations in Sharjah, Dubai, and Ajman. The Mini Melts factory, which covers 10,000 square feet, has been purpose built with state-of-the-art equipment. In particular, the cryogenic equipment that we use is the most sophisticated ice cream cryo machine in the world today. The factory is ideally located to enable us to supply Mini Melts ice cream across all the countries in the Middle East.
