Insulation mica tapes Wrappes up with PE or Fiberglass, mainly used for high performance cable or motor industry, with a temperature up to 950°C
Character: Exceptional high dielectric strength High tensile strength Strong resistance to radiation, acid and alkali Non-toxic under high temperature Excellent flexibility Heat resistance up to 950°C
Specification: Width: 5-1000mm Length: 300-10000m
Standard cores: 52mm, 54mm, 76mm, 120mm
Packing: Pack in wooden or steel case, carton or pallet. Various specifications available according to customers' requirements
