

high pressure injection pump / packer

510500
China

Injection pump Usage: EPOXY, polyurethane injection for structure strengthening/concrete repairing
The following are the best sellers:
SL-605: max output pressure can reach 10000PSI
SL-808: max output pressure can reach 13500PSI
SL-999: max output pressure can reach 15000PSI
Similar look, most sparts are exchangeable. Seal kits and pump sets are designed specially for different model and both are considered as easy-wearing parts. Need to replace regularly.
