For more than 30 years, Energy International Corporation has been the leader in industrial design, supply, installation and operation and maintenance of electro-mechanical controls for the construction, aviation and transportation industries. EIC supplies electro-mechanical products to a prestigious list of corporate and government entities and has contributed to the creation of international airports, trade centers, shopping malls, gas refineries, hospitals, hotels, schools and factories across the globe. Energy International Corporation is growing to meet the ever-evolving needs of our customers. We actively participate in the development of full-spectrum business relationships with our associates and suppliers so we may fulfill the expanding demand for top-quality engineering products and services.
