Established in the autumn of 2001, CRE8 is a strategic creative solutions company. We offer our clients a unique service - brand development, design, photography and event management, which can be integrated to deliver a cohesive end product. Headed up by Managing Director, Richard Shirazian, CRE8 has a talented design team with a wealth of experience gained from working with many prestigious clients in Europe and the Middle East. With photography, copywriting and Arabic artwork all taken care of in-house, we provide a complete turnkey service from brief to delivery. Since moving to the Sheikh Hamdan Awards Complex in 2010, we have expanded our photographic studio and also brought large format and digital printing in-house. Our design philosophy is to constantly strive for innovation, creativity and unusual solutions that fit our clients' brief. We are passionate about our design and our objective on each project is to deliver an end product that our clients will be proud of. We thrive on the creative challenge of working on a variety of projects and are committed to providing all of our clients, whether large or small, with a distinctive and memorable solution on time and within budget.
