Peeraj Group was established in the U.A.E. in 1973. A pioneer in the services of Oil and Gas, Power and Process industries, Peeraj made a beginning as one of the several freight forwarders to the Oil and Gas industry. Today it has carved itself a niche as one of the leading freight forwarding and clearing companies in the United Arab Emirates. On a global scale, success often means offering the customer as many services as possible from one source to ensure smooth operation of business. Recognising the importance of this need, Peeraj diversified into related fields, all of which offer its customers comprehensive support encompassing trading, engineering, products & services and logistics. This unified and centrally coordinated system has enabled Peeraj to offer ideal and cost effective solutions to its customers. Our core team of trained multinational professionals drawn from varied disciplines of industry, technology, services and management, ensures the highest levels of project execution. Our focus has constantly been on quality and excellence of service. It was therefore a natural extension of our efforts when we were awarded the coveted ISO 9001:2000 certification by Det Norske Veritas (DNV).
