ALZAR FZE provides consulting services to many different industries. We have connections with major European suppliers in the Ceramics, Leather, Agriculture, Plastic, Construction, Glass, Oil and Gas and other industries. These connections enable us to offer quality products at competitive prices for companies involved in those industries. Over the years Alzar's name has become synonymous with Quality, Reliability, Honesty and Integrity. We are committed to provide our delegates unparalleled service with solutions to increase efficiency and cost effectiveness. Our recent endeavors have enabled us to become a one-stop shop of raw materials for many industries such as Ceramics, Leather and Glass. Our technical expertise gained by years of experience combined with our committed and well educated Engineers will ensure that your company receives not only quality products, but also quality advice. We have built our reputation with long-term relationships in mind. Our existence depends on the prosperity of the companies we deal with, and we strive to help them grow rapidly and steadily. We would like you to navigate our website for further information on the products and services we offer, and be sure to write us a line or a give us a call should you require further information.
